

Discovered in 1808

by

Louis-Josef Gay-Lussac
and Louis-Jacques
Thénard in Paris,
France, and Humphry
Davy in London, UK

Boron is added to
glass to increase its
resistance to heat
shock

The name Boron
comes from the
Arabic word "buraq". It
was the name of
mineral borax

Boron

B

5

Compound boric acid is lethal to insects
but not harmful to mammals, thus it is
used in pesticides
