

Discovered in 1982

Discovered by  
Peter Armbruster and  
Gottfried Münzenberg

Made by bombarding  
bismuth with iron atoms

Meitnerium is named  
for the Austrian  
physicist Lise Meitne

Meitnerium

# Mt

# 109

Meitnerium had fifteen recognized radioactive isotopes, eight of which have atomic masses of 266 to 278.
